JULY 23

EMEA - APAC

Global Mobility: The Road to Transformation

2020 has seen the Global Mobility Executive conduct the industry's most comprehensive survey into the use of technology within Global Mobility Programmes. Engaging with Global Mobility and HR leaders from across the world has enabled us to extract unparalleled insights into exactly where organisations are on their digital journey.

During these challenging times and the continuous shifts in demographics, the HR and Global Mobility sphere is expanding way beyond the traditional operational role and becoming a vital business enabler. Now, more than ever before, it is crucial that HR and Global Mobility leaders leverage technology in order to innovate and transform to keep ahead of the curve.

Our virtual leaders exchange offers Global Mobility and HR Leaders an exclusive opportunity to take a deep dive into the results of our survey, analyse the key findings and explore future trends, with a particular focus on:

- **How are organisations utilising technology and data analytics to ensure future operational readiness and agility.**
- **How automation is transforming Global Mobility and the future world of work.**
- **The vital tools required to enable operational efficiency.**
- **The role AI and Virtual Reality will play in supporting GM functions.**

The aim is to ensure attendees leave with renewed perspective and enthusiasm into how technology is being utilised to enable our future world of work.

All our attendees will receive an exclusive pre-release digital copy of the Road to Transformation report.
